

GitLab to Jenkins NSCCUploader Investigation Guide

Goal: Verify whether a GitLab pipeline can trigger the existing Jenkins NSCCUploader job.

Investigation Steps

1. Open the repository and locate .gitlab-ci.yml. 2. Confirm GitLab pipelines are enabled. 3. Add a test upload stage. 4. Add Jenkins credentials as GitLab CI variables. 5. Commit and push a test file. 6. Verify the GitLab pipeline runs. 7. Verify Jenkins NSCCUploader receives the request.

Example .gitlab-ci.yml

```
stages:
  - upload

upload_nsc:
  stage: upload
  script:
    - |
      curl -X POST \
        -u "$JENKINS_USER:$JENKINS_TOKEN" \
        -F "FileToTransfer=@test.txt" \
        -F "DestinationDirectory=/home/s_lys" \
        -F "EmailAddresses=you@company.com" \
        "$JENKINS_URL/job/NSCCUploader/buildWithParameters"
```

GitLab Variables

```
JENKINS_URL
JENKINS_USER
JENKINS_TOKEN
```

Test Commands

```
echo "test" >> test.txt
git add test.txt
git commit -m "test upload"
git push
```
